DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 12-78, 81-86 and 90-92 are drawn to a locking device, classified in class 292, subclass 36.
 - II. Claims 7-11, 79 and 80 are drawn to a passive lock, classified in class 292, subclass 341.15.
 - III. Claims ~~87-89~~⁸⁸, drawn to a method of multi-point locking, classified in class 292, subclass 36.
 - IV. Claim 89, drawn to a method of multi-point locking including a passive lock, classified in class 292, subclass 341.15.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for locking a door against a frame having a standard keeper. See MPEP § 806.05(d).
3. Inventions I and III as well as inventions II and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as

Art Unit: 3627

claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

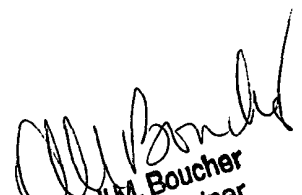

6. A telephone call was made to Walter Zimmerman on September 22, 1999 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Walsh whose telephone number is (703) 305-0444.
